

OFFICERS 2010-2011

Shelly Halper, M.D.

President

Jonith Breadon, M.D.

Vice-President

Mark Hoffman, M.D.

Secretary/President-Elect

James Herrmann, M.D.

Treasurer

CHICAGO DERMATOLOGICAL SOCIETY

OUR PRESIDENT

Dear Colleagues,

I am delighted to be the current president of the Chicago Dermatological Society.

I was born in Detroit, Michigan and raised in a nearby suburb, Oak Park, Michigan. My parents were both educators in the public school system. My mother taught English and ran the media center in a nearby middle school. My father worked in Highland Park, Michigan as a teacher, then counselor, and eventually as a grade school principal and administrator. To this day, I can recall the great pride I felt when I would walk into his school and be called "Mr. Halper's daughter." I am grateful to both of my parents for their unique influences on my life. From my mother I have learned to appreciate order and exactness, and from my dad, the confidence to know that I could achieve any goal that I set for myself.

What may surprise people is that when I graduated from high school, I moved to New York City to pursue my interest in modern dance. I attended Columbia University and danced and worked as a waitress. When that became too much to do well, I quit college and danced for the next three years. I had the opportunity to travel with a number of smaller dance companies and while in Italy became interested in language. I went back to school at Hunter College in Manhattan and graduated with a combined degree in chemistry and romance language. I went to medical school at SUNY Stony Brook on Long Island, New York. I then moved back to Detroit to start my internship at Henry Ford Hospital. It was at Henry Ford that I met my husband, Ronald Mochizuki, who was a resident in physical medicine and rehabilitation. We married soon thereafter.

When I matched in dermatology at the University of Chicago, we were thrilled because my husband's three best friends and a sister were all living in Chicago and it made the transition a lot easier. Ron had an additional year left of his residency in Detroit. I moved here eight months pregnant and alone. Nevertheless, he was able to get a few rotations in the Chicago area and we managed to see each other on most weekends.

During my residency at the University of Chicago, I had the opportunity to get to know many of Chicago's best teachers, both at the U. of C. and through the Chicago Dermatological Society. My chairman was Al Lorincz, M.D. who was a very soft-spoken man, with a brilliant and creative mind. Maria Medinica, M.D. taught dermatopathology. We had daily sessions from 8am-9am and then weekly unknowns where we were

given five slides to identify and keep. Maria was a very devoted teacher and I left very confident about dermatopathology on the day of my boards. Keyoumar Soltani, M.D. was our surgeon. Although we did not have Mohs surgery at that time, we had privileges in the outpatient O.R. and I assisted and performed procedures on hundreds of cases. Finally, Sylvia Griem, M.D. was the residency director and was a great role model who was able to be both a physician and a mother.

I began my practice, Dermatology Associates of LaGrange, in 1991. I started with 2 examination rooms (rent \$1000/month) and one employee. Today my practice has four wonderful physicians: Alexandria Meccia, M.D., Samantha Conrad, M.D., Stacy McClure, M.D. and myself. We have one PA and two aestheticians. We have 11 exam rooms and are planning an expansion into adjacent space over the next several months. I still love my field and enjoy the variety of patient encounters including difficult medical cases, surgery, and cosmetics. I really like to keep up with new technology and treatments, trying to keep a balance of the old and the new.

In my personal life, I have been married for 23 years and have a 22-year-old son, Michael, a fifteen-year-old

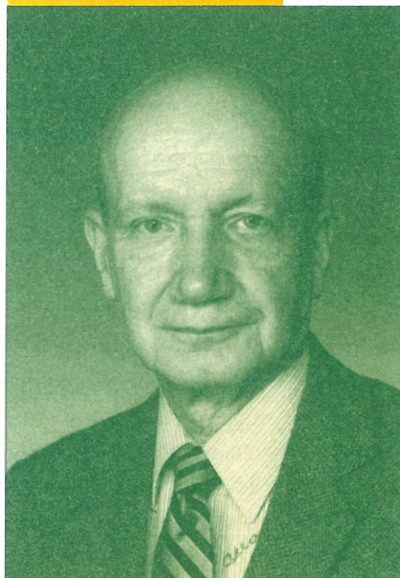

continued on page 3

FROM THE EDITOR

It is hard to believe but this is the 20th year that I have been editing our CDS Newsletter. The first issue appeared in the fall of 1991 when I was president of the CDS. The issue featured the inaugural ALLAN LORINCZ LECTURE. The lecture was endowed by funds received from current and former residents, faculty, staff, and colleagues who were associated with Dr. Lorincz in his many years at the University of Chicago. That issue also introduced the just-released Evaluation and Management Codes from HCFA. The Residents Corner-featuring bios on the first year residents at all the medical schools as well as where the third year residents had gone-appeared in the first issue. New members were also highlighted. Drs. Shelley Halper, Brian Cook, Stephanie Marschall, Kevin Pinski, May Chow, Andrew Scheman, Julie Moore, and Tom Victor were all new CDS members that year.

It has always been my philosophy to emphasize the personal side of our members when they are featured. In this age of the information technology explosion, an old-fashioned newsletter may seem obsolete. I still feel that there is a niche for this particular communication. Let me know if you agree or disagree. Finally I would like to give a special thank you to my wife, Lynn, whose help with creativity and editing over the years has been invaluable.

Mark Gendleman, M.D.

Allan L. Lorincz died in Chicago on September 7th, 2010 at the age of 85, after a long struggle with Parkinson disease. He will be deeply missed by many former colleagues and students.

Born in Chicago, Dr. Lorincz received all his higher education and spent his entire career at the University of Chicago. There he was elected to Phi Beta Kappa and received a baccalaureate degree in 1945; was elected to Alpha Omega Alpha and received a medical degree in 1947; performed a medical internship in 1948; and completed a dermatology residency in 1951 and a research fellowship in 1952. He joined the full-time faculty of the University of Chicago as an Assistant Professor of Medicine (Dermatology) in 1952. He maintained this appointment while fulfilling military service as Chief of the Department of Dermatology at the Walter Reed Army Institute of Research in Washington, DC from 1954 to 1956. He was promoted to Associate Professor in 1957 and to Professor in 1967, and served as Chief of the Section of Dermatology from 1960 to 1991. After stepping down as Chief, he continued to work full-time in education and patient care until his retirement in 2006.

Early on, Dr. Lorincz's legendary mentor, Dr. Stephen Rothman recognized his uncommon gifts and provided him with a fine laboratory, ample protected time, and an ideal atmosphere of intellectual stimulation and collegiality. In that supportive environment Dr. Lorincz pioneered diverse investigations on collagenase, melanogenesis, tumor immunology, endocrinology, mycology, neurophysiology, and lipid chemistry.

Following his promotion to Chief at the U. of C., Dr. Lorincz turned away from the bench to take on new administrative demands. He took great pride in his role as leader and especially enjoyed educating his house staff. He was a peerless diagnostician with an awe-inspiring frame of reference and an immense treasury of personal experience. His deep understanding of basic science and dermatopathology sharpened his clinical acumen. He added notably to the clinical literature, contributing papers on wound healing and on creative therapeutic uses of sulfones, niacinamide, tetracycline, and opiate antagonists. In all, he had over 130 publications.

Dr. Lorincz was board-certified in dermatology and syphilology and in dermatopathology in 1974. He held positions of high distinction in numerous medical societies, including service on the Board of Directors and as Vice President of the Society for Investigative Dermatology. He received honorary memberships in the dermatological societies of Denmark, Venezuela, Japan,

I first met Dr. Lorincz when I interviewed for my residency in dermatology. I recall sitting in his office and discussing politics. He had very strong opinions on how the country should be run and they were quite similar to my parents' viewpoint, so I felt quite comfortable with him. By the time I began my residency I was eight months pregnant, so my short maternity leave did cause some hardship for the department. However, he never made me feel guilty about that and in fact had a one-year-old grandson, Tommy, who lived with him, and the boys would play together at departmental functions. His wife Lillian, made the baby blankets that became the "blankies" of my first two children's childhood.

Our dermatology division was quite small at that time. We had two or three residents per year and one fellow in dermatopathology. Therefore, we got to know one another quite well. Having come from Henry Ford Hospital in Detroit, I was used to departmental parties at a downtown hotel. Our first departmental party was a potluck in the hallway at the U. of C. We were more like a family then, with everyone bringing a dish to pass around. You would often see Dr. Lorincz sitting at his desk, eating a homemade lunch prepared by his wife.

Dr. Lorincz had such a brilliant mind. The only thing he didn't know was that most of us were not as smart as he was. He would discuss a case and assume that we were all as experienced as he was. He would never make anyone feel uncomfortable even if they were unfamiliar with a disease. He did not like to see too many patients during a clinic and preferred to use an individual patient as an opportunity to understand the complexity of his or her condition. He loved to discuss itch and many a medical student came out dazed after a one hour discussion about the mechanism of itching.

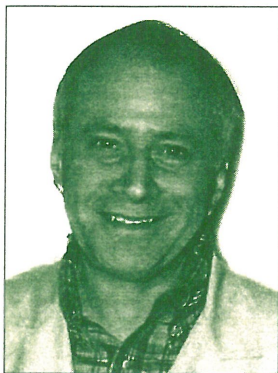

Dr. Lorincz's father was a pharmacist (as was Dr. Lorincz). He had dozens of compounds that he would use for a variety of skin diseases. I recall a lecture that he gave to the residents where he explained many of his "recipes." I have often thought of those over the years. He was truly an artist/clinician and would individualize the treatment to the patient. Saturday clinics were required for all the first year residents and were attended by Drs Lorincz and Medinica. I recall a patient coming hours after the clinic was closed and Dr. Lorincz was still willing to go down and see her despite it being late on a Saturday afternoon.

I know that Dr. Lorincz had many accomplishments that will be written about by Dr. Shea and others. However, as a mentor and teacher, I will remember his gentle nature, his brilliant mind, and his kind heart. On behalf of all the residents that both preceded and followed me, we are forever indebted to him for our careers in dermatology that have brought so much satisfaction.

Shelley Halper, M.D.

continued on page 3

IN PASSING: RONALD B. MINKIN, M.D. (1933-2010)

Ronald B. Minkin, M.D. passed away on July 18, 2010, at his home in Chicago. He was 77 years old. He is survived by his wife of 43 years, Harriet, and their sons Jeffrey (Lauren) and Jason (Jennifer) and grandson, Andrew.

After finishing college, Ron worked with his father in Omaha, Nebraska. After graduating from the University of Nebraska Medical School, he interned at Michael Reese Hospital in Chicago and took his dermatology residency at Northwestern University. It was at Northwestern that I first met Ron. After watching him work in the clinics and at staff conferences, I asked him to join me at the Hammond Clinic in Munster, Indiana. We worked together for 39 years. It was such a long and wonderful partnership that a lot of the patients considered us as one unit. His patients loved him and I am sure they will miss him. He always spent as much time with his patients as he deemed necessary, and because of this he was always behind and worked past the end of his hours.

Besides practicing in Munster, Ron was on the voluntary dermatology staff at Northwestern University, first in their clinics and then at the Lakeside V.A. I am sure many former residents will remember him fondly for all the hours he put in with them. Besides dermatology, he enjoyed reading, photography, and researching purchases for himself and his friends. If you needed new tires on a car or a dishwasher, all you had to do was ask Ron and all the information would be forthcoming. Consumer Reports question? Ha, we had Ron. He also enjoyed Chicago, especially going out to eat in newly discovered restaurants.

Ron will be missed by his patients, colleagues, and friends and most of all by his wife, sons and their families, and of course his grandson, about whom he would not stop talking.

Mark Gordon, M.D.

IN PASSING: TRUDY FOX-EISENMAN (1940-2010)

Trudy Eisenman passed away recently in Tarpon Springs, Florida. She trained at Northwestern University Department of Dermatology, graduating in 1973. Trudy practiced general dermatology in Chicago and at Weiss Hospital. She retired many years ago and lived in Hawaii. Trudy was an excellent clinical dermatologist who was respected by her dermatology and medical colleagues.

Mark D. Gendleman, M.D.

LORINCZ (continued from page 2)

South Korea, and Poland. The University of Chicago Medical and Biological Sciences Alumni Association presented him with its Gold Key Award in 1997 and Distinguished Service Award in 2007. He served as the President of the Chicago Dermatological Society and of the Illinois State Dermatological Society. In 1989 he received the first Gold Medal Award of the CDS and was further celebrated by the creation of an endowed lectureship bearing his name, still the highlight of the annual CDS meeting conducted at the University of Chicago. The fame of Dr. Lorincz shall endure through these renowned lectures held in his honor.

Dr. Lorincz married his devoted wife Lillian (née Tatter) in Chicago in 1952; they remained united until her death in 1996. He is survived by their children Linda, Donald, and Alice, three grandchildren, and his brothers, Drs. Albert and Andrew Lorincz, both alumni of the University of Chicago School of Medicine. A memorial service at the University of Chicago was held on October 27, 2010.

Dr. Lorincz epitomized the consummate clinician-academician of the old school: dedicated healer, profound scholar, and cherished master to countless students, residents, and fellows.

Christopher R. Shea, M.D.

OUR PRESIDENT (continued from page 1)

daughter, Allie, and an eleven-year-old daughter, Lauren. Our daughter Kara, died in 1995 at the age of four from neuroblastoma and will forever be in our hearts. During her illness, a number of my friends from CDS covered my practice and I am forever grateful to Drs. Jeffrey Bakal, Colleen Keegan, Julia Marshall and Gerta Janss.

My personal interests include spending time with my family, playing tennis, and still watching lots of dance. Fortunately, my two daughters are very involved with dance so I have ample opportunity to see amazing work. We have a summer home in Michigan, where we water-ski, swim, kayak and read. This has brought us a lot of joy over the past fourteen years.

Although I trained at the University of Chicago, I have taught residents at the University of Illinois and Hines, V.A. Hospital. It is through these relationships that I have had the opportunity to grow as a physician. I am very happy to be the current President of the CDS. A major goal of mine during this administration is to encourage collegiality among our membership. I cherish my many years at the CDS. Let me know if there is anything that you need, or if you have an interest in a more active role within our organization. I look forward to an educational and enjoyable year with all of you.

Shelley Halper, M.D.

INFANTILE HEMANGIOMAS

Children's Memorial Hospital's Division of Dermatology is seeking patients for an IRB-approved study for the treatment of facial and body infantile hemangiomas (IHs). Our study involves investigating the safety and efficacy of oral propranolol. There is a 10% chance of patients receiving a placebo and a 90% chance of patients being in 1 of the 4 treatment arms. Patients in the treatment arm can be randomized to propranolol 1 mg/kg/day or 3 mg/kg/day for 3 or 6 months. Patients have frequent visits for the first month to closely assess blood sugars and heart rhythm.

The discovery by chance of the potential efficacy of propranolol, a well known beta-blocker used for many years, is a major potential breakthrough and this clinical international, multicenter, collaborative prospective study will be the largest controlled trial to date studying infantile hemangiomas.

The study will be held at the Children's Outpatient Center at 2515 N Clark St, Suite 900 in Lincoln Park. Anthony J. Mancini, MD is the principal investigator. Please have possible candidates contact Anne Mahoney at amahoney@childrensmemorial.org. Anne can also be reached at phone number: 773.327.3326 for more detailed exclusion criteria.

Inclusion Criteria:

- Age 35 to 150 days old
- Subjects must have a facial proliferating IH with largest diameter of at least 1.5 cm.

Exclusion Criteria:

- The hemangioma must not be:
 - Life-threatening IH
 - Function-threatening IH (e.g. those causing impairment of vision, respiratory compromise caused by airway lesions, etc.)
 - Ulcerated IH with pain and lack of response to simple wound care measures
- Previously administered systemic or intralesional corticosteroids, vincristine, alpha-interferon, propranolol or other beta-blockers
- Previously administered treatment for infantile hemangioma or surgical procedures have been performed to remove one or more infantile hemangioma

JOHN WEISS, M.D.

John Weiss, M.D. recently concluded a term as President of the Pacific Dermatological Association. The organization, with some 800 members, operates on the West Coast and the Pacific Rim. This constitutes a trifecta for Dr. Weiss who also has been President of the Chicago Dermatological Society and the San Francisco Dermatological Society. He now lives in Oakland, California with his wife Suzanne, and practices in Castro Valley, California.

NEW MEMBERS

JONATHAN COTLIAR, M.D. attended Trinity College in Hartford, Connecticut for his undergraduate education and the University of Kentucky for medical school. He completed his internship at Loyola University and both a medical and dermatology residency at UCLA. He has joined the Department of Dermatology at Northwestern University as an assistant professor.

DAVID MANN, M.D. attended the University of Illinois at Urbana-Champaign and then the Mayo Medical School. He completed an internship at the Northshore University HealthSystem and a dermatology residency at the University of Chicago. He is in private practice with the Illinois Dermatology Institute in Skokie, Illinois with Drs. David Lorber, M.D. and Nona Craig, M.D.

2010-2011 Meeting Schedule

Wed., Oct. 13, 2010

Northwestern University
(Bluefarb Lecture)
Gerald Lazarus, M.D.

Wed., Nov. 10, 2010

University of Chicago
(Lorincz Lecture)
Edward V. Maytin, M.D., PhD.

Wed., Dec. 8, 2010

University of Illinois
(Fretzin Lecture)
Sewon Kang, M.D.

Sat., Jan. 22, 2011

Coding Seminar
Daniel Segal, M.D.
et. al.

Wed., March 2, 2011

Stroger-Cook County Hospital
(Barsky Lecture)
TBA

Wed., April 13, 2011

Stephens Convention Center, Rosemont, IL
Unity in Dermatology

Wed., May 18, 2011

Rush University
(Malkinson Lecture)
Richard Edelson, M.D.

Wed., June 8, 2011

Loyola University
TBA

New Residents

COOK COUNTY HOSPITAL/STROGER

MICHELLE CHEVALIER, M.D. is a graduate of Rush University Medical Center. She received a BA from Colgate University in Hamilton, New York with a major in molecular biology and a minor in English. She completed her internship at the University of Chicago Medical Center in internal medicine.

ELIZABETH FAHRENBACH, M.D. grew up in Wilmette. She received a BA from Dartmouth College in Spanish language, culture, and society. She then graduated from the Loyola University/Stritch School of Medicine. In her spare time she enjoys hanging out with her friends and large extended family who live in the Chicago area. She was married in mid-September to her medical school sweetheart, who is now in his PGY-2 year in ophthalmology at Loyola. They love to cook, go to rock concerts, water-ski in the summer and cross-country ski in the winter.

JULIA KASPRZAK, M.D. is a graduate of the University of Wisconsin School of Medicine and Public Health. She received a BS from the University of Wisconsin with a double major in biology and Spanish.

LOYOLA UNIVERSITY

ALLISON GODDARD, M.D. grew up in southwestern Kansas and worked in the field of oral and maxillofacial surgery for 10 years prior to medical school. She received a Bachelor of Science degree from the University of Massachusetts while working for the OMFS residency program at the Massachusetts General Hospital. She then graduated from Saba University School of Medicine. She then went on to complete a preliminary internship in internal medicine in Denver, Colorado. Her special interests within dermatology include cutaneous lymphomas as well as mucous membrane dermatoses. Outside of work, she loves yoga, traveling, and cooking for friends.

ANJALI SHAH, M.D. grew up in Libertyville, Illinois, and attended the University of Wisconsin at Madison. She completed medical school at Loyola, and her medical internship at Kaiser San Francisco before returning to Loyola for dermatology. She enjoys international volunteerism and traveling, hiking, yoga, cooking, and running.

NORTHWESTERN UNIVERSITY

LISA ARKIN, M.D. grew up outside of Orlando, Florida and went to Brown University. She concentrated on early American history but spent nearly as much time onstage (performing, writing, and directing) as she did in the library. Prior to deciding to become a physician, she worked for seven years as a story editor for cable television in New York City. While working in New York, she began volunteering with children with cystic fibrosis, which eventually led to a career shift into medicine. She completed her post-baccalaureate undergraduate studies at Columbia University and subsequently attended medical school at the University of Pennsylvania. She was an intern in pediatrics at the Children's Hospital of Philadelphia. She is interested in the cutaneous manifestations of systemic disease in children, and intends to complete a pediatric dermatology fellowship at the end of her residency.

ANNE GOLDSBERRY, M.D. grew up in a small suburb outside of San Francisco. She attended Harvard University where she studied economics and played varsity water polo. After college, she returned to the sunshine state to earn an MD/MBA from the University of Southern California. She completed her internship at Cedars Sinai Medical Center. Her academic interests include health care delivery models, workforce shortages, and incentive structures. Personal interests include yoga, her dog Lucy, and cooking.

NILA GUNAWARDANE, M.D. grew up in Kandy, in the central hills of Sri Lanka. After completing high school in Sri Lanka, she attended Harvard University where she majored in economics, concentrating on development and health economics. Following graduation from Harvard Medical School she moved to Chicago for her residency. She is now in her second year of the combined internal medicine-dermatology residency program. At Northwestern, her academic interests include medical dermatology and global health.

BENJAMIN MARKS, M.D. grew up in Milwaukee, Wisconsin and moved to Skokie, Illinois for high school. He received a B.S. from the University of Illinois in Urbana-Champaign where he majored in biochemistry. He attended medical school at Yale School of Medicine, graduating from a combined MD/PhD program. His dissertation involved autoreactive T-cell development within the thymus. He looks forward to using his background in immunology to better understand T-cell mediated autoimmune dermatologic diseases (such as psoriasis) and collagen vascular disorders.

AMANDA COOPER, M.D. grew up in Danville, Illinois, daughter of a veterinarian and French teacher. She majored in molecular and cellular biology at the University of Illinois in Urbana-Champaign and then attended medical school at the Medical College of Wisconsin in Milwaukee. She completed an internship at Aurora St. Luke's Hospital in Milwaukee. She moved to Chicago with her beloved Yorkshire terrier, Mr. Boots.

ELIANA KRULIG, M.D. was born and raised in Caracas, Venezuela, where she received her medical degree at Universidad Central de Venezuela. After graduating from medical school, she completed two years of clinical research: the first in Miami and then the second in Chicago, under Dr. Francisco Kerdel and Dr. Kenneth Gordon. She is interested in medical dermatology, especially psoriasis. Ellie enjoys traveling and spending time with her husband, family, and friends.

ADRIENNE SCHUPBACH, M.D. is originally from central Illinois. She completed her undergraduate training in finance at the University of Illinois at Urbana-Champaign and her medical degree from the University of Illinois at Chicago. Adrienne completed her internship in internal medicine at the University of Connecticut. She enjoys traveling, a variety of outdoor activities, and spending time with her family.

KARL VANCE, M.D. was born and raised in the suburbs of Minneapolis and pursued an undergraduate degree in chemical engineering at Stanford University. After a brief stint in the wine business, he attended medical school at the University of Colorado in Denver. He completed his preliminary year in internal medicine at the University of Hawaii.

GRADUATES - WHERE ARE THEY NOW?

JOHN H. STROGER/COOK COUNTY HOSPITAL

LAUREN FINE, M.D. is taking further training with Amy Taub, M.D. at Advanced Dermatology in Lincolnshire, Illinois.

ERIKA MUSIC, M.D. returned to her home state of Kentucky and is in private practice in Lexington at Dermatology Consultants.

VICTORIA NEGRETE, M.D. is in private practice in Neenah, Wisconsin at the Dermatology Associates of Wisconsin.

LOYOLA UNIVERSITY

LINDA SHEU, M.D. has joined the faculty at Sutter-Roseville Medical Center in Roseville, California.

TRICIA HULTGREN, M.D. is in private practice with Dermatology Specialists in Omaha, Nebraska.

NORTHWESTERN UNIVERSITY

SUSAN BOONE, M.D. is doing a procedural dermatology fellowship at the Dayton Skin Surgery Center in Dayton, Ohio.

KATHERINE BROWN, M.D. has joined the Department of Dermatology at Rush University Medical Center. She will be doing their patch testing as well as general dermatology.

DAVID REED, M.D. has joined the Department of Dermatology at John H. Stroger/Cook County Hospital. He will be seeing inpatient consults, as well as general dermatology.

RUSH UNIVERSITY MEDICAL CENTER

LAUREN CAMPBELL, M.D. is in private practice in Houston, Texas at the Dermatology Association of Texas.

MELINDA SIMON, M.D. has joined the Northwestern Memorial Physician Group in private practice in Northbrook, Illinois.

UNIVERSITY OF CHICAGO

DIANA BOLOTIN, M.D. is doing a Mohs fellowship at Northwestern University Department of Dermatology.

DAVID MANN, M.D. is in private practice in Skokie, Illinois with David Lorber, M.D. and Nona Craig, M.D.

CHRISTIANE QUERFELD, M.D. is doing a dermatopathology fellowship at Northwestern University and has joined the faculty of the University of Chicago Department of Dermatology. She will see patients in their CTCL Clinic.

UNIVERSITY OF ILLINOIS

TANYA BULJ, M.D. is in private practice at Advocate Illinois Masonic Innovative Dermatology in Chicago.

SABRINA GUILLEN, M.D. is in private practice at GBK Dermatology in San Diego, California.

RIKK LYNN, M.D. is in private practice in Santa Barbara, California.

CAROLINE SCHMITT, M.D. is in private practice at the Dean Clinic in Madison, Wisconsin.

AMBER STEVENSON, M.D. is in private practice with the Sutter Medical Group in Sacramento, California.
